

# Pantech Tailgate Operation

- Take remote and red key from behind the middle seat to operate the control panel.
- The control panel is located at the left hand rear side of the vehicle, open the cover and plug in the controller and insert the red key
- Turn the red key to the ON position
- Flick switch on the right side from OFF, to the left to engage the tail lift / controller
- Un-latch the D Shackle on the tail lift
- Fully lower the tail lift with the Down arrow
- Pull red hand rope to fold out the tail lift
- Press the up / down arrows to operate the tail lift.
- Once Finished, Fully lower the tail lift and fold back into place.
- Fully raise the rail lift back into position
- Re-attach the D shackle to ensure the tail lift is secured
- Switch the red key to Off and remove the key and controller and close the cover
- Return the key and controller back in the cabin behind the middle seat.
