

Tie Down Procedure Rollers

- Make sure the trailer is attached to the towing vehicle before loading and you have a spotted as required.
- Put down the ramps of the trailer and approach slowly. Make sure the wheels are aligned with the ramps and load the roller in the center of the trailer making sure the balance is right.
- Turn the roller off and make sure the control unit is secured.
- Attach the straps as shown, ensure that the machine is secure.

2 x short straps to be used at the front crossed over.
1 x dog & chain to be used at the back
