

RISK ASSESSMENT
MONITOR INDUSTRIES
143 GUNNEDAH HIGHWAY
TAMWORTH N.S.W. 2340

PLANT DESCRIPTION. *Truck Mounted Telescopic Boom Type MEWP.*
MODEL TYPE. *GSR E 209PX*

DATE OF ASSESSMENT. *15.09.2020* **ASSESSMENT CONDUCTED BY.** *Monitor Ind.*
RISK ASSESSMENT METHOD USED. *Visual Inspection.*

<u>THE IDENTIFIED HAZARD</u>	<u>RISK.</u>		<u>THE PROPOSED METHOD OF CONTROL MEASURE</u>	<u>ARE THE RISK CONTROLS METHODS PRACTICAL.</u>	
	<u>YES</u>	<u>NO</u>		<u>YES</u>	<u>NO</u>
<i>Persons could be injured or injure others when operating the Truck Mounted Boom without sufficient instruction, training and information.</i>	Yes		<i>Having obtained all the relevant information regarding the machine and its functions management should ensure that the EWP operator is thoroughly trained in its safe operation. The operator must hold an appropriately endorsed National Certificate of Competency. Training should be reviewed and revision recorded.</i>	Yes	
<i>Persons could be injured if they attempt to exit the platform should the power source fail to function.</i>	Yes		<i>Management should ensure that the operator is instructed how to use the emergency lowering device.</i>	Yes	
<i>Persons could be injured if the operator of the truck mounted boom is unfamiliar with the working environment.</i>	Yes		<i>Management should ensure that the operator is instructed to inspect the area where the machine is intended to be operated prior to commencing work and also to establish if there are any specific local requirements.</i>	Yes	
<i>Persons could be injured if a truck mounted boom that has a "DANGER DO NOT USE" tag attached is operated.</i>	Yes		<i>Management should ensure that the operator is instructed that the machine shall not be used until a suitably authorized person removes the "DANGER DO NOT USE" tag.</i>	Yes	
<i>Persons could be injured if the unit is used to exceed its nominated maximum rated capacity (M.R.C.) for the platform.</i>	Yes		<i>Management should ensure that the operator is instructed that the M.R.C. of the truck mounted boom platform is not exceeded. The weight of all people, tools and materials must be considered at all times.</i>	Yes	
<i>Persons could be injured if they incorrectly lowered the platform in the event of a power failure.</i>	Yes		<i>Management should ensure that the operator is instructed to advise persons at ground level how to operate the emergency lowering device.</i>	Yes	
<i>Persons could be injured if the main chassis has not been leveled using the stabilizer system.</i>	Yes		<i>Management should ensure that the operator is instructed to ensure that all stabilizers are in firm contact with the supporting surface and the machine base is level.</i>	Yes	
<i>Persons could be injured if the operator performs duties that are not his/her responsibility and beyond the scope of his/her technical capabilities</i>	Yes		<i>Management should ensure that the operator is instructed not to carry out any work that is outside his/her normal duties and report any matter of concern to his/her supervisor.</i>	Yes	

<u>THE IDENTIFIED HAZARD</u>	<u>RISK.</u>		<u>THE PROPOSED METHOD OF CONTROL MEASURE</u>	<u>ARE THE RISK CONTROL METHODS PRACTICAL.</u>	
	<u>YES</u>	<u>NO</u>		<u>YES</u>	<u>NO</u>
<i>Persons could be injured if the parked truck mounted boom was started and/or operated by an unauthorized person/s.</i>	Yes		<i>Management should ensure that the operator is instructed that upon leaving the machine he/she should switch off the engine take the key with him/her.</i>	Yes	
<i>Persons could be injured if any of the platform's limits or safety devices are disabled.</i>	Yes		<i>Management should ensure that the operator is instructed to check that all limits and safety devices are functioning correctly prior to commencing operation. The results of the inspection should be recorded in the maintenance/log book.</i>	Yes	
<i>Persons could be injured if the Truck Mounted Boom tips over due to items being placed against the unit.</i>	Yes		<i>Management should ensure that the operator is instructed not to allow items such as ladders etc to be placed against the boom, platform or any other part of the machine.</i>	Yes	
<i>Persons could be injured if they were not aware that the truck mounted boom was in use and they progressed into the work zone.</i>	Yes		<i>Management must ensure that the operator is instructed to ensure that suitable guarding/ barriers are in place prior to commencing operations.</i>	Yes	
<i>Persons could be injured by live electrical conductors on overhead power line poles if the E.W.P. is near them while in operating mode.</i>	Yes		<i>Management should ensure that the operator is instructed to ensure that the minimum clearance between a E.W.P. while in operating mode and overhead power lines on poles is 3m below and on each side. Any part of the E.W.P. or its components are not permitted anywhere above the power lines. A certificated spotter is required for the sole task of observing and warning against any unsafe approach to the power lines and any other electrical apparatus between 3m and 6.4m of power pole lines.</i>	Yes	
<i>Persons could be injured by live electrical conductors on overhead power line towers if the E.W.P. is near them while in operating mode.</i>	Yes		<i>Management should ensure that the operator is instructed to ensure that the minimum clearance between a E.W.P. while in operating mode and overhead power lines on towers is 8mbelow and on each side. Any part of the E.W.P. or its components are not permitted anywhere above the power lines. A certificated spotter is required for the sole task of observing and warning against any unsafe approach to the power lines and any other electrical apparatus between 8m and 10m of tower power lines.</i>	Yes	

NOTE.

All risks are considered to be major risks.

This document sets out a list of risks which Monitor Industries `believes should be brought to the operator's attention on site. It is an extract from our complete Risk Assessment which also includes technical and design criteria which may be of little interest to the operator.
