

MONITOR Z-16RT

The Monitor 4 × 4 Jack Boom Lifts are extremely unique in the fact they can be used as a conventional self-propelled boom-lift, or the jacks (stabiliser legs) can be deployed from the basket to level the machine on uneven ground. Brilliant? You could say!

For the first time in Australasia, Monitor Lifts are able to supply you with a self-propelled boomlift that can operate safely on sloping and uneven terrain. As we know, the world is not always flat!

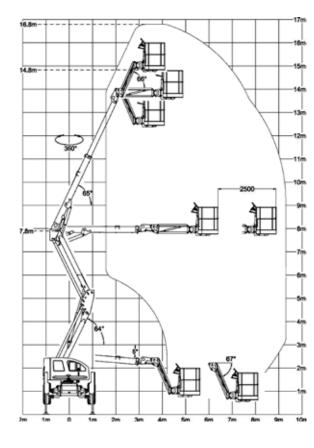

The jacks provide set-up on slopes of up to 12 degrees. But then of course you can tackle even more angle if required with the use of stabiliser pads which are stored on the machine's chassis. Just like a Rough Terrain scissor lift, you don't need to use the jacks if you are operating on level ground.

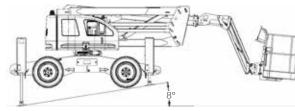

The feedback from rental owners and contractors has been exceptional, as the performance of these machines is terrific, and returns are stronger than with conventional models. Operators feel safer and also love the confidence they can have in knowing that the job will get done!

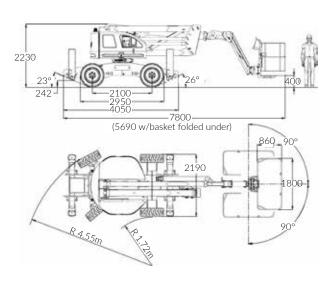

16.8M WORKING HEIGHT

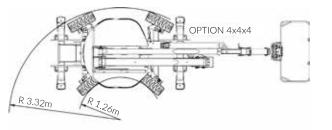

TECHNICAL SPECIFICATIONS

DI	100754	0	
ñt	(CA 175)	h	
15		31	
1	2 m C		
1 59		11°	

Max working height	16.80 m	
Max horizontal outreach	9.40 m	
Max rated capacity	230 kg	
Weight	8050 kg (8200 kg 4WS)	
Turret rotation	360°	
Basket rotation	180°	
Ground pressure driving (approx)	670 kN/m2	
Max stabiliser force	35.61 kN	
Max stabiliser pressure (std foot pad)	670 kN/m2	
Traffic load (live load) travelling	4.8 kN/m2	
Traffic load (live load) elevated	10.0 kN/m2	
Auto levelling	Std	
Max permissable tilt: Tyres/Stabs	5° / 1°	
Max slope for stabilisers (no extra pads)	11° x 8°	
Gradeability lengthwise	23°	
Gradeability sideways	23°	
Standard engine	Kubota 35 Hp Diesel	
Max drive speed	6 km/h	
Electric emergency lowering	Optional	
Generator 5 kVA	Optional	

(All specs E&OE and subject to change)
